## Bridgeton Landfill Owners Offer to House Area Residents

**KMOX Radio St. Louis - May 8, 2013 6:05 AM**

<http://stlouis.cbslocal.com/2013/05/08/bridgeton-landfill-owners-offer-to-house-area-residents/>

**BRIDGETON, MO (KMOX)** - If you live near Bridgeton Landfill and the smell is getting to be too much the company which owns it is offering to put you up in a hotel.

Bridgeton Landfill LLC, owned by Republic Services Inc., will cover the **rate** and taxes at an extended stay hotel or an inconvenience fee of \$125 per week for residents in Spanish Village, the Terrisan Reste Mobile Home Community, and certain areas of the Carrollton Village Condominiums.

The temporary relocation begins Sunday, May 19 and runs through at least June 14 as workers drill down into the landfill to remove pipes in hopes of alleviating the smell. During the work the stench is expected to worsen.

## Bridgeton landfill offers to relocate residents with expected increase in odor

KMOV Ch. 4 St. Louis - May 7, 2013 at 5:14 PM | Updated today at 7:31 AM

Residents living near the Bridgeton landfill are being given a choice to relocate to nearby hotels while work is done at the landfill to attempt to reduce the odor.

The plan, dubbed the Reinforced Concrete Pipe Abandonment Project, involves the excavation of small sections of the landfill to remove reinforced concrete pipe sections.

As a result, the work could increase the odor for local businesses and residents. Because of the possibility of the already very strong odor getting stronger, the landfill is offering residents of Spanish Village, the Terrisan Reste Mobile Home Community and a section of the Carrollton Village Condominiums temporary alternative housing.

For the approximately 270 households in the area, the landfill will pay for the nightly hotel lodging, fees, and taxes starting on Sunday, May 19 and continuing through the completion of the RCP Project; which is expected to be June 14.

Residents will be provided rooms with kitchenettes, and families with pets will be directed to pet-friendly hotels.

To fight the odor that will come from the project, workers at the landfill are looking at installing misting systems to deodorize during work. In addition, ongoing air monitoring will be continued both on and off site during this work to ensure that the air is safe to breathe for employees and local residents.
